

A POWERFUL COMBINATION FOR GAPS IN CARE MANAGEMENT.

Well Informed and RationalMed for Cigna.

Leveraging integrated medical, pharmacy and laboratory data, our Well Informed and RationalMed for Cigna programs work together to identify care improvement opportunities for your patients with Cigna-administered coverage.

Here's how they work

Well Informed

This program helps to identify disease prevention and improvement opportunities through gaps in care, such as:

- › Medication adherence
- › Patient safety
- › Achievement of key clinical targets
- › Monitoring
- › Appropriate therapy or drug

In most instances, we send a letter to both you and your affected patients regarding the identified gaps, and provide personalized instructions to help reduce and close them.

For more information about RationalMed for Cigna, call 800.717.6630.

For more information about Well Informed, call 800.88Cigna (882.4462).

RationalMed for Cigna

This program helps to identify additional risk-reduction opportunities related to potential gaps in care, such as:

- › Adverse drug disease consideration
- › Adverse drug interaction
- › Dose duration consideration
- › Customer age consideration
- › Drug and pregnancy complication consideration
- › Drug therapy duplication
- › Duration consideration
- › Excessive dosing
- › High-risk medications
- › Misuse/abuse
- › Pharmacogenomics
- › Polypharmacy
- › Quantity considerations
- › Under dosing

We send RationalMed for Cigna messages through your electronic medical record (EMR) or by letter or fax. Prescribing pharmacists will also receive alerts to help ensure care is coordinated across your patient's health care team. Note that we will not send information to patients.

Together, all the way.®
