

Education Committee Update

With a year of no face-to-face meetings, the Regional Education Days have been on hold in 2020 and our focus has been on hosting Webinar-based presentations. Attendance for these webinars has been outstanding. We made a concerted effort to select timely topics in a year of uncertainties. The responses we have received from attendees has been extremely positive.

Below is a comprehensive list of the 2020 webinar events we have produced to date. Additionally, we have enjoyed a wonderful collaborative relationship with our friends at the North Carolina Medical Society and expect this to continue in 2021. Those joint webinars are noted below, in white.

We miss our face-to-face meetings and the networking opportunities afforded by the having personal interactions with one another. But, if 2021 doesn't allow for these to return, we will continue focus on virtual gatherings.

Many thanks to the members of the Education Committee. We welcome new members anytime, and of course, we welcome ideas for future educational events. Please email me directly at:
